

### **OEC Accessibility Accommodations Spring/Fall**

Highlands Nordic has an all terrain motorized vehicle on site for special transportation needs. Permission must be obtained from parent/guardian and school principal for use during field trips.

The John Deere Gator is best used during the fall and spring outdoor education field trips. It is not used in the winter for ski trails or snowshoe trails.

It is a 2 passenger vehicle with a seat belt. The driver must be a Highlands Nordic staff member.

There is a space in the back for carrying equipment. No passengers are to be transported in the back.

There is a windshield and roof to cover the students in adverse weather.

The seat is off the ground, so depending on the student, they may need to be lifted into the vehicle.
